Distinctive Printing

PRINTING is the ambassador of trade. It is sent out to acquaint your customers with your business. It goes where you cannot be; it tells the story you would have told had you been able to go in its stead; it is the means by which you hope to attract attention to your house; to interest the public and secure patronage. In order to achieve these results it is vitally essential that your printing have distinctive qualities. Ordinary printing is forgettable printing. Distinctive printing impresses itself upon the mind and brings results. *It costs you no more.*

Stone's Fertilizers

The latest report from Germany, states that in 25 years German Farmers have increased their yield of wheat per acre by 57 per cent., Rye by 73 per cent., Barley by 52 per cent., Oats 80 per cent., Potatoes 61 per cent., and Hay 53 per cent., chiefly by the liberal use of Commercial Fertilizers.

The results of 50 years continuous use of Fertilizer on Wheat at the Experimental Station at Rothamsted, England, shows:

Unfertilized.....13.1 bus. Average yield per acre

Complete Fertilizer.....37.1 bus. Average yield per acre

These experiments of Rothamsted are the most exhaustive and reliable in the history of agricultural investigation, and should command the serious attention of every wheat producer.

A Few of the Well Known "STONE" Brands

"Fall Wheat Special"

"Grain and Root"

"Fodder special"

"Pure Bone Meal"

"XXX Potato and Beet"

"Tobacco Manure"

"Fruit Special"

"Garden Truckers"

These Fertilizers made from finely mixed pure ingredients, in perfect condition for drilling, will nourish the soil, and their presence will protect the roots from the attacks of grubs and insects. Can be sown broadcast or with Drill.

One of Many Strong Testimonials

Ingersoll, Oxford Co., Dec. 4, 1912

Dear Sirs,—During the past twelve years have used Fertilizer regularly but never with such good results as in the past season.

With good farms on both sides, I had by far the best fields of Hay and Oats, and my Fall Wheat never looked nearly as well in any other year as it does at the present time.

I have everything that is good to say about Stone's Complete Fertilizers, and you may use this letter as freely as you like with the farmers who want to know if it pays to use Fertilizers.

Yours Truly,
